COMPANY PROFILE

Nanning Youlun Import and Export Trading Co., Ltd.

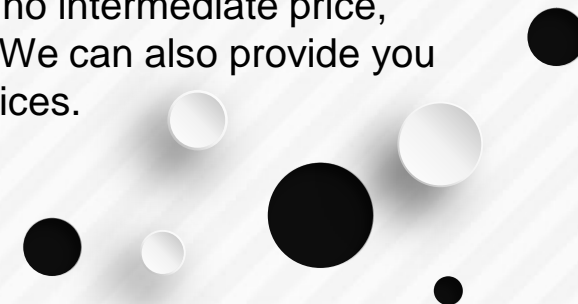

Nanning Youlun Import and Export Trading Co., Ltd. is a comprehensive and export-oriented enterprise, integrating production, research and trade.

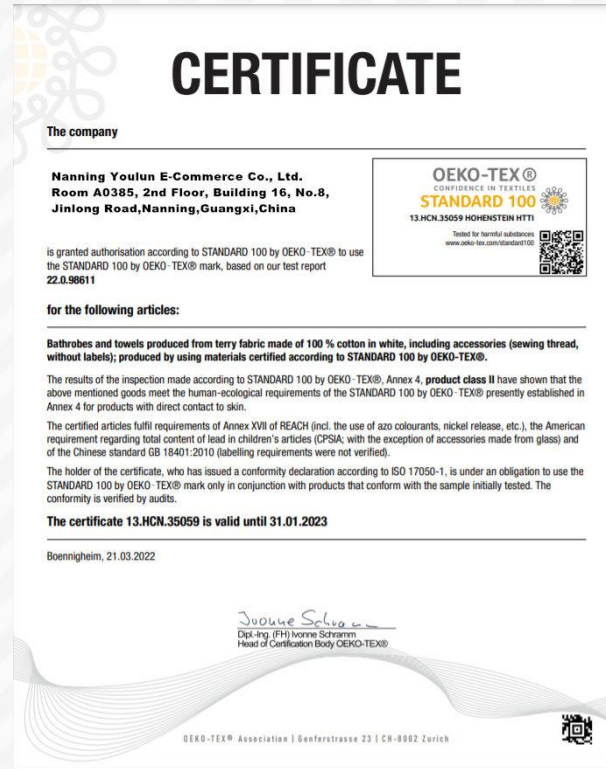

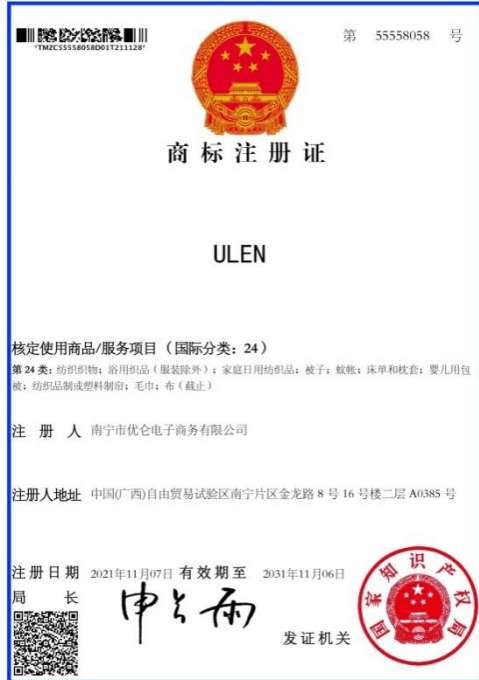

We have two independent brands, one is Ulen and the other is YOU MENG ER. The main products include: bedding (hotel linen and household linen), towels (hotel towels and household towels, beach towels, sports towels, etc.), bathrobes, tablecloths, chair covers, silk quilts and other textile products.

The cooperative countries cover nearly five continents in the world, and the products are sold to many countries and regions around the world, and have established good cooperative relations with customers.

Our greatest advantage is that we have our own raw material production base, providing a one-stop process from raw materials, manufacturing to finished products. There is no intermediate price, which can save you more purchasing costs. We can also provide you with worry-free logistics and distribution services.

▶ Trademark&Certification

1. Washing process of white towel (100KG 75%-80% loading capacity)

Step	washing process	wash water level	washing temperature	washing time	light dirt wash (reference dosage)	Heavy soil washing (reference dosage)
1	Sorting pre-wash	medium/high	cold water			
2	main wash	medium	50—60℃	20mins	Strong detergent 300g Color bleaching powder 400-500g Emulsifier 100~200g	Strong detergent 500g Emulsifier 200~300g Chlorine bleaching powder 200~400g
3	water /3 times	high	cold water	3mins		
4	neutralize/soften	Low	40—45℃	5mins	Acid 100g Softening Powder 250g	Acid 150g Softening Powder 250g
5	High speed dehydration					

2. Colored towel washing process (100KG75%-80% loading capacity)

step	washing process	wash water level	washing temperature	washing time	light dirt wash (reference dosage)	Heavy soil washing (reference dosage)
1	Sorting pre-wash	Medium /high	cold water			
2	main wash	medium	50—60℃	25mins	Neutral detergent 100-200g Color bleaching powder 300—400g Emulsifier 100~200g	Neutral detergent 200-300g Color bleaching powder 400—500g Emulsifier 200~300g
3	water /3 times	high	cold water	3mins		
4	neutralize	low	40—45℃	5mins	Acid 150g Softening Powder 250g	Acid 150g Softening Powder 250g
5	High speed dehydration					

3. Sheets washing process (100kg tank)

step	time	Water level	temperature	Product and dosage	drain
wet	2mins	high			
Main wash	20mins	medium	65° C	Strong whitening washing powder 350g + whitening bleaching powder 150g	drain
water	3mins	high	40° C		drain
medium speed dehydration	1mins				
water	2mins	high	Cold water		drain
water	2mins	high	Cold water		drain
Neutralize and supple	4mins	low	Cold water	100 grams of neutralizer + 250 grams of softener	drain
High speed dehydration	5mins				

4.tablecloth washing process (100 kg tank)

Step	time	Water level	Temperature	Product and dosage	drain
wet	2mins	high			
Pre-wash	5mins	medium	50° C	Strong degreaser 400g (or emulsifier)	drain
Main wash	20mins	medium	70° C	Strong washing powder 400g + sterilization color bleaching powder 150g	drain
water	3mins	high	40° C		drain
medium speed dehydration	1mins				
water	2mins	high	Cold water		drain
water	2mins	high	Cold water		drain
Neutralize and supple	4mins	high	Cold water	100 grams of neutralizer	drain
High speed dehydration	5mins				

Precautions:

1. Washing method: gentle washing;
2. The amount of washing auxiliaries should be placed in strict accordance with the requirements of the instructions, more or less is not good;
3. The loading capacity of washing towels is 75%-80% of the designed capacity of the washing machine, example, a washing machine with a capacity of 100 kg loads towels with a weight of 75-80 kg.

2. Precautions for anti-pilling and pilling

When washing towels, load towels according to 70%~80% of the capacity of the washing machine. If it is higher than 80%, it is easy to fluff and pill.

1. Use high water level when washing towels, and low water level towels are easy to pilling.
2. Towel washing and cleaning should be clean.
3. Precautions for anti-staining and discoloration

1. Dyed or yarn-dyed towels cannot be washed with white towels.
2. Do not touch dyed or yarn-dyed towels: heavy-duty detergents, chlorine-containing detergents (chlorine bleaching powder), hydrosulfites and other auxiliaries.
3. Dyeing or yarn-dyed towels should be dried in time after washing, and should not be stacked in damp to prevent staining.

white towel washing precautions

1. White towels cannot be washed with dyed or yarn-dyed towels.
2. Heavy detergents should not be used when washing white towels, which will affect the whiteness of the towels.
3. It is not advisable to use color bleaching powder or chlorine bleaching powder for long-term or large-scale washing of white towels.
4. The choice of white towel washing auxiliaries should have a whitening effect, so that the whiteness of the towel will not decrease. Such as: whitening washing powder, whitening color bleaching powder, etc.

Laundry Aids

No.	item	function	note
1	whitening laundry detergent	Decontamination and whitening for towels, sheets and other clothing	
2	softener	Soft for towels, sheets, etc.	
3	water softener	It is used to improve water quality when washing clothes (poor water quality will produce soft and hard calcium, which will affect the hand feeling)	
4	Strong detergent	For decontamination of dirty clothes	
5	Color bleaching powder	For clothes sterilization and bleaching	It is not suitable for long-term use in large quantities, and it is easy to be damaged due to strong damage.
6	Chlorine bleaching powder	For clothes sterilization and bleaching	It should not be used every day, it is easy to be damaged by strong damage
7	Enzyme laundry detergent	Detergent powder to prevent pilling in towels	Not suitable for long-term use, a new towel can be washed 1-2 times
8	Rust removal powder	For the treatment of water or water pipes with high scale	
9	neutralized powder	Acid-base neutralization when the alkalinity is high when used for washing	It should not be used too much, the acid is too strong, and the towel is easily damaged and damaged.
10	blood stain remover	For the treatment of blood stains on clothing	For pre-washing of towels and laundry
11	For pre-washing of towels and laundry	For the treatment of various stains on tablecloths	
12	Emulsifier	For the treatment of various stains on tablecloths
